

**Confidence and responsibility to lead industry
Challenges of a pioneer enterprise**

Various achievements over the years helped us gain valuable know-how for the first time in Japan, and for the industry, as a wholesale importer.

The industry's largest "Tokyo Customs Authorized Bonded Warehouse"

"Uchihara Bonded Warehouse Tokyo," a facility established inside Uchihara's Tokyo headquarters, is a special space where shipments from overseas can be stored, inspected, and exhibited in mint condition before customs clearance. This space has attracted the industry's attention as trend setting in the Japanese jewelry industry, as it is the fastest route to introduce the new line-up of jewels making headlines overseas. Uchihara Group regularly holds a "Bonded Exhibition Event" at the bonded warehouse every spring and autumn, and it has acquired a favorable reputation from people in charge of purchasing at department stores and boutiques.
